

JOSHUA DURRETT

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Pgressio (Fullstack Web App) – A social media application where people can track and organize their progress in any hobby or activity to be viewable by the public, user followers, or the communities created within. App allows for users to submit images, videos, links or plain text, all of which are formatted and stored into individual reels, acting as organized folders for posts in a specific activity.

MC Modpack Discovery (Fullstack Web App) – A collaborative project developed by a group of software engineers, where users can log-in or view the interactive visualization of the mods used within Minecraft modpacks, all kept on a cloud-based database. Once users are verified as an admin, users can add or edit existing elements in the modpack collection, from within the application.

Other Projects: APOD Web App with NASA API integration, Boonaki's Web-API for Teas, Tea Discovery Web App with a personally developed Tea API integrated, On-demand background color changer for Partnered Twitch streamer, and many more.

Full Stack Web Developer at Boonaki Web Development | Raleigh, NC

January 2021 — Present

Developed responsive and accessible fullstack web applications and static websites for clients with small and medium sized businesses with full design permissions. Also, consulted on branding, SEO and social media strategy.

Client Work Example

- Jasmine Johnson, Onya Rose Photography
<https://onyarosephotography.netlify.app> :: (919) 825-9080

Project Foreman | Boydton, VA

December 2020 — December 2021

Oversaw the production and installation of 284 Hot Air Containment Units (HACS) with a team of 4-5 people at 2 different locations across the east coast over the course of the year.
